## A Blend of Tradition and Innovation

Selleys, an esteemed Australian brand with over 80 years of heritage, has established itself as a leading name in premium home products. Renowned for its dedication to quality and innovation, Selleys brings this expertise to its line of faucets, merging time tested craftsmanship with cutting-edge technology.

At the core of Selleys faucets and accessories is the use of 100% Premium brass and PTMT (Polytetra Methylene Terephthalate) material, ensuring that consumers can trust their products for a healthy and high-quality living standard. These high-quality components not only ensure remarkable strength and durability but also contribute to the faucets' longevity. Selleys delivers products that stand out for their performance and reliability. This blend of robust materials and modern engineering provides users with a faucet that is both aesthetically pleasing and highly functional.

Selleys offers a diverse range of designs, with carefully curated categories that cater to various tastes and styles. Each faucet is crafted to offer a premium look and feel, enhancing the visual appeal of any space. This extensive range ensures that there is a Selleys faucet to suit every kitchen, bathroom, and outdoor setting. One of the key benefits of choosing Selleys is the assurance of long-lasting performance. The faucets and accessories come with extended warranties, reflecting the brand's confidence in their durability. Additionally, the smooth handling of each faucet is a testament to Selleys' commitment to user satisfaction, providing effortless operation and precise control.

Selleys faucets and accessories are designed with the culture and preferences of Sri Lankans in mind, while their cores are engineered to handle the diverse water qualities and pressures found across different landscapes.

In conclusion, Selleys faucets and accessories exemplify the perfect fusion of tradition and innovation. Whether enhancing a kitchen, bathroom, or outdoor area, Selleys faucets and accessories offer a blend of style, functionality, and durability that stands the test of time.

The 'Aqua' range is crafted from upgraded PTMT (Polytetra Methylene Terephthalate), offering exceptional durability and superior chemical resistance. Unlike typical plastic, PTMT provides enhanced qualities such as UV resistance and extreme durability, making it ideal for heavily used locations. This material ensures temperature stability and easy maintenance, making it a practical choice for modern homes. Additionally, the core construction of the 'Aqua' range improves water flow, adding to its functionality. Environmentally friendly and aligning with sustainable living values, the 'Aqua' collection combines practical benefits with modern aesthetics to enhance any space. Ideal for those who appreciate both durability and style, the 'Aqua' range offers a superior alternative to conventional plastic, providing a perfect blend of practicality and contemporary design for an elegant and efficient home.

## Why should you buy **SELLEYS BATHWARE**

- + **Stringent Quality Control:** Our manufacturing process adheres to rigorous quality control standards, utilizing the finest raw materials to ensure excellence.
- + **Expert Craftsmanship:** All operations are carried out by highly experienced technicians, ensuring top-notch production quality.
- + **Diverse and Affordable Models:** Explore a wide range of modern models at competitive prices, designed to meet various tastes and budgets.
- + **Quality Assurance:** We offer robust quality assurance through a standardized manufacturing process, supported by a nationwide sales network.
- + **Spare Parts and Accessibility:** Enjoy the convenience of readily available spare parts and a straightforward purchasing process.
- + **Exceptional After-Sales Service:** Benefit from excellent after-sales support provided by our experienced technicians, part of Nippon Paint Lanka (Pvt) Ltd's extensive network across the country.
- + **Consumer-Centric Approach:** Our product introductions are tailored to meet consumer needs, reflecting a deep understanding of the market.
- + **Reputable Branding:** Selleys, a prestigious Australian brand with over 80 years of heritage, is marketed by a Sri Lankan company affiliated with Nippon Paint, a globally renowned and reliable company with over 140 years of excellence.

### CUSTOMER GUIDELINES

Use 25mm or 20mm pipes rather than 15mm to ensure better water flow and to overcome the reduction in diameter of the pipeline due to scaling inside the pipeline.

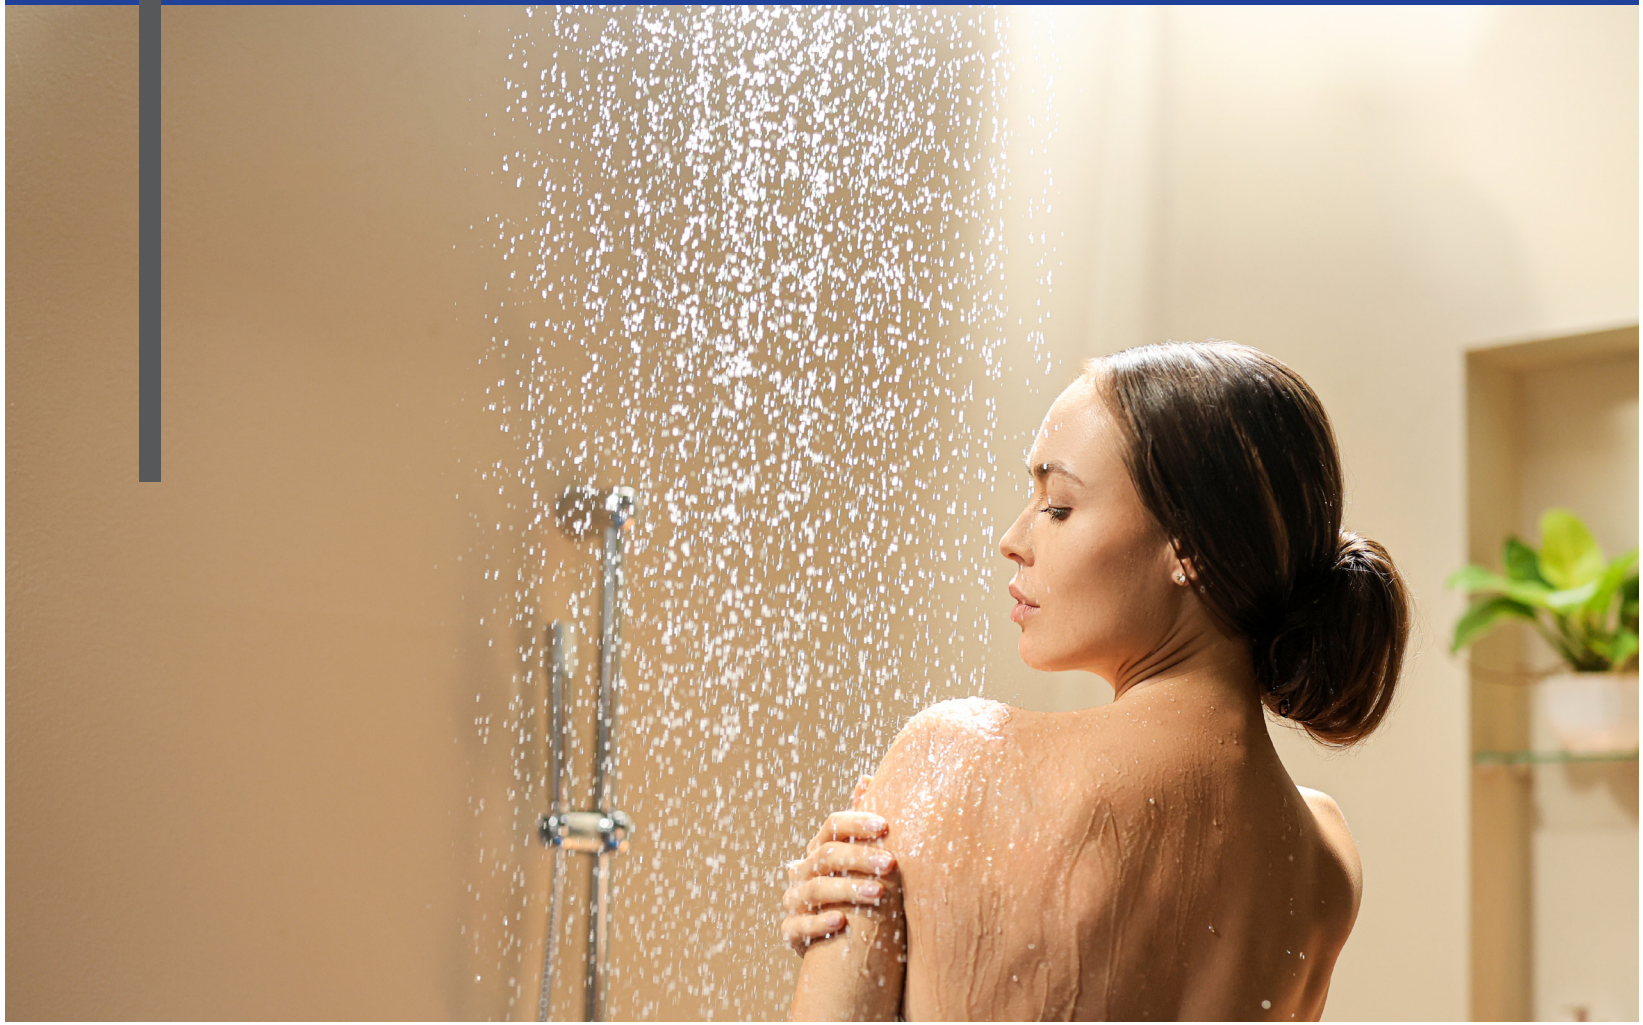

- Keep the minimum number of bends in the pipelines and make it travel straight and vertical as far as possible.
- Test the working of all the concealed fittings installed on a high pressure for leakage before plastering or fixing the line.
- Clean the aerators provided within the things at regular intervals for an ideal foam flow of water from the fittings.
- Place the outlet point within the overhead tank a minimum of 25cm higher than the bottom level of the water tank. These prevent the flow of external particles, sand, etc. along with water supply into the fittings and thereby preventing the possible damage to the working parts.
- Clean the tank thoroughly before the supply starts. It is suggested that the overhead tank must be cleaned at regular intervals to avoid the deposition of foreign particles.
- Clean the fittings regularly with regular soap or chalk powder to remove scaling/stains. Do not use strong detergents as this may cause damage to the chromium finish provided in all Selleys products.
- Do not use harsh cleaning agents containing abrasive and acids, instead use a soft sponge or wet fabric with cleaner water/diluted vinegar to safeguard the color coated finish.
- For the longevity of the bath accessories and faucets, it's best to install these products after thorough cleaning of your newly finished or renovated bathroom or kitchen.

To protect the excellent finish of fittings from dirt stains and other damages, cover them with cloth/poly pack after their installation till they come into actual use.

We suggest that center distance for hot & cold inlet for all types of wall mounted mixers should be maintained between 165mm - 175mm, in which any case of our wall mixers from different ranges can easily installed without any problem.

For any type of technical or service assistance, please contact the nearest Selleys branch office, area representative or authorized dealer.
